

# GREEN PHILIPPINES

Greening the Philippine Industries with the **ECO PROFIT** Approach

A project funded by  
The European Union's Asia-Pro Eco Programme

## Waste management

## Waste management -

is more than simply arranging containers in the enterprise!

- **Legal compliance with waste relevant regulations**
- **Setting up a company specific waste logistics**
- **Information/motivation**
- **Continuous controlling**

Quelle: PREPARE Toolkit-Foliensatz

## Why do enterprises optimise their waste management?

- **Legal compliance**
- **Risk minimisation,**
- **Disposal security**
- **Positive image,**
- **Motivation**
- **Implementation of waste minimisation measures and cost reduction**
- **WMP, EMAS, ISO 14001**

## Methodology - waste management

- **Check of the legal compliance with the waste management act - corrections**
- **Depending on the company structure: Showing the waste streams according to type of waste, waste quantities and costs**
- **Check of the weakpoints of the waste logistics**
- **Determination of minimisation and cost reduction potentials**
- **Definition, implementation and controlling of measures**

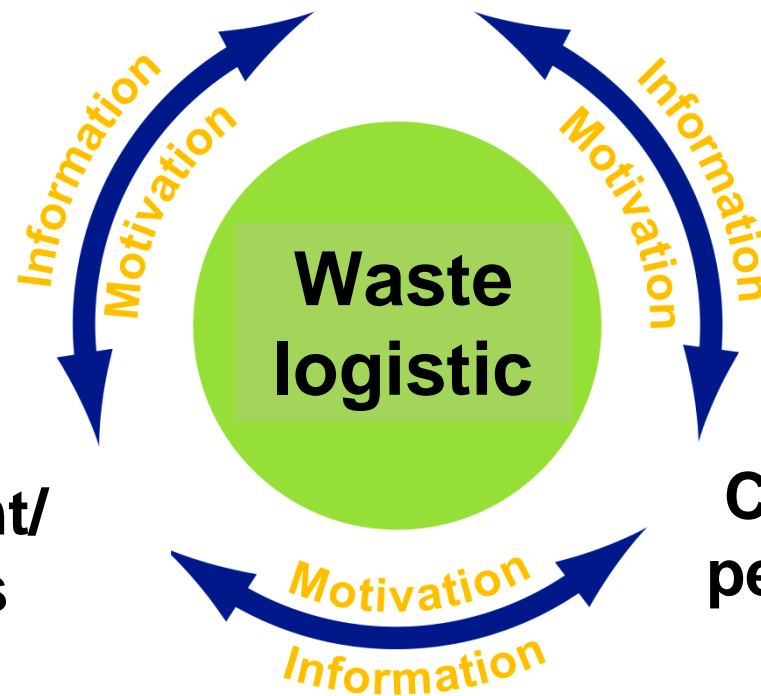

## Setting up the in-company waste logistics

- **Involvement of the employees in their respective working areas**
- **Information on the correct waste separation**
- **Adapted container systems**
- **Re-design of the waste collection points**
- **Involve the cleaning personnel**
- **Motivation of all involved persons**

## Important success factors for a well working waste logistics

## Checklist for legal compliance

- 
- **When do we talk about waste?**
  - **Which types of waste do we have?**
  - **Which waste relevant duties are due for me?**
  - **How do I fulfill these duties?**
  - **Which corrections are necessary?**

Quelle: PREPARE Toolkit-Foliensatz

## Why do enterprises optimise their waste management?

- **Transparency of quantity and costs of the waste streams**
- **Targeted minimisation and recycling measures**
- **Correct waste separation - disposal security**
- **Essential reductions of residual waste - cost reduction**
- **Waste management as a part of the waste management plan**
- **EMAS-regulation, ISO 14001**
- **Visible example for a „living“ environmental protection -**
- **motivation of employees**
